

# Pantera Dump Bailer

The Pantera Dump Bailer or PDB® is a gravity bailing system used for dumping cement, bridging support, chemicals, and other materials into the wellbore.

In a variety of diameters, the PDB comes in a volume presentation of ½ gal, 1 gal and 2 gal capacity. These capacity presentations makes straight forward the calculations of the volume of the dumping material inside the wellbore.

## Specifications

| Model            | PDB-A      |      |       |   |       |    |
|------------------|------------|------|-------|---|-------|----|
| Diameter         | 1.66"      |      | 1.90" |   | 2.37" |    |
| Capacity (gal)   | 1/2        | 1    | 1/2   | 1 | 1     | 2  |
| Length (ft)      | 5.4        | 10.8 | 4     | 8 | 5     | 10 |
| Material Tubing  | Mild Steel |      |       |   |       |    |
| Material Threads | 1045       |      |       |   |       |    |
| Ends             |            |      |       |   |       |    |
| Thickness        | 2 mm       |      |       |   |       |    |

# Pantera Dump Bailer

## Features

- Multiple capacity per bailer size.
- Welded threads ends.
- Low cost.
- Serial identification per section.
- Mild Steel Material.
- Suitable for gravel dumping.
- Easy to use and maintain.

## Application

- Dumping Cement, bridging material or chemicals.

## Benefits

- Easy calculation of capacity.
- Easy maintenance procedure.
- Strong body section.
- Reliable and durable.
